## MY STACKS

- Git, GitHub, GitHub Action & CI/CD Pipeline
- JavaScript & TypeScript
- ReactJs & NextJs
- React Query, Redux, and zustand
- Shadcn, Material-UI, Tailwind CSS, and SASS
- Jest and Cypress
- **API Development**
- **Tools:** RESTful APIs & GraphQL.
- React-Aria
- react-i18next
- PWA (Progressive Web App)
- Web Assembly
- **CMS:** Directus
- **Design:** Canva & Figma
- **Project Management:** Jira, Monday.com, Asana, ClickUp, & Trello
- **Communication:** Slack, Microsoft Teams, Zoom, Google Meet, Session ...

## SOFT SKILLS

- Critical Thinking, Problem-Solving, and Decision Making.
- Team Player & Emotional Intelligence.

## VOLUNTEER EXPERIENCE:

- **Gender President**
- **Eden President**

## SUMMARY:

Seasoned Senior Frontend Engineer with 5+ years crafting high-performance, scalable web applications. Specializes in data-first architecture for managing large content volumes while delivering exceptional user experiences through responsive, accessible interfaces and optimized rendering.

## WORK EXPERIENCE:

### GiriToday, Remote

Jan. 2025

#### Senior Frontend Software Engineer

- Designed and implemented a **data-first architecture** to efficiently manage and scale large volumes of content within the marketplace application, ensuring optimal performance and maintainability.
- Implemented **Incremental Static Regeneration (ISR)** to optimize data fetching, enabling instant page loading and improved SEO performance for large, content-heavy applications through efficient server-side rendering.
- Led the frontend team in maintaining application stability and uptime, aligning technical priorities with business goals to avoid disruptions and safeguard revenue.
- Took initiative in aligning technical decisions with business goals to preempt potential issues and led efforts to quickly resolve user complaints, ensuring minimal disruption and high customer satisfaction.
- Led weekly Friday demo meetings with stakeholders to present progress, outline remaining tasks, communicate challenges, and provide real-time responses to feedback—while maintaining flexibility to adapt based on stakeholder input.
- Worked independently with minimal supervision while empowering team members by avoiding micromanagement, fostering a culture of trust and accountability that optimized overall engineering output and team performance.
- Played a key role in risk assessment by analyzing technical implications of business decisions and highlighting potential vulnerabilities that could be misused by staff or users, thereby strengthening system integrity and reducing exposure.
- Work closely with UI/UX designers and back-end developers to deliver smooth and intuitive user experiences.
- Developed responsive web experiences, mobile-first apps, and PWAs with a focus on accessibility.

### Orange Invent House, Remote

Mar. 2022 – Dec. 2024

#### Senior Frontend Software Engineer

- Spearheading the frontend team, mentoring junior developers, managing different repositories, secrets, deployments, and resolving branch conflicts.
- Work closely with UI/UX designers and back-end developers to deliver smooth and intuitive user experiences.
- Develop applications using Data-First Design to ensure performance, scalability, and dynamism.
- Develop new features, including a widget for third parties, as iteration continues.
- Developed responsive web experiences, mobile-first apps, and PWAs with a focus on accessibility.

***Frontend Software Engineer (Orange Invent House)***

- Ensured web app is accessible across many platforms, including laptops and smartphones.
- Doubled as the DevOps Engineer.
- Engineered and implemented automated CI/CD pipelines for seamless deployment of Vite (React TypeScript) and Next.js applications to AWS infrastructure.
- Responsible for managing cloud resources and infrastructure.
- Optimized web application for maximum performance, speed, and scalability.

**Newage Solutions, Hybrid****Jan. 2024 – Jul. 2024*****Senior Frontend Software Engineer***

- Joined Newage's team in building several software solutions, which include: Invidux, a property tokenization solution, Adin LMS Solution, Edurex LMS Solution, and Exam proctoring.
- Building reusable code (components) for the organization.
- Debugging and resolving deployment errors.
- Assist clients with frontend application deployment on cloud infrastructure.
- Mentoring junior developers and interns.
- Ensuring the performance, quality, and responsiveness of applications.
- Collaborating with teams across different areas of software development.
- Implementing security and data protection measures.
- Staying up to date with the latest technologies, JavaScript ecosystem, and React Server Components (RSC) Ecosystem using tools like daily.dev

**Prioclen Consulting, Remote****Feb. 2023 – Jan. 2024*****Frontend Software Engineer***

- Joined Prioclen's team in building a user verification and authentication Web Application – [amala.cloud](https://amala.cloud)
- Developed new user-facing features.
- Developed CI/CD pipeline to deploy React TypeScript app to Azure.
- Ensured web security best practices in development and deployment for data protection compliance.
- Implemented cloud infrastructures on Azure and handled website hosting on shared hosting.
- Developed Progressive Web App (PWA).
- Ensured web design was optimized for smartphones (responsiveness).
- Ensured the technical feasibility of UI/UX designs.
- Assured that all user input is validated before submitting to the back-end.

**EDUCATION:****AltSchool Africa – Lagos, Nigeria****June 2023***Cloud Engineering – DIPLOMA IN ENGINEERING***Federal University of Technology – Akure, Nigeria****Nov. 2018***Physics Electronics – BACHELOR OF TECHNOLOGY**Second Class upper-division (4.25/5.0)***CERTIFICATION:**

- **Web Development Bootcamp** – UDEMY
- **The Full-Stack JavaScript Bootcamp** – GOMYCODE
- **Technical Product Management** - UDEMY
